

Deputy Clerk Report May 2026

May has brought an increase in office and phone traffic with upcoming events, construction projects and returning part-time residents with an array of needs.

I am enjoying my role as utilities manager and navigating Caselle a bit easier. The new check scanner has made cash receipting and deposits faster and easier without the need to stand in the long summer lines at the bank.

Website monitoring and maintenance are ongoing. The HPC project of converting Architectural Surveys to a PDF format that can be easily accessed is well underway, as well as digitizing and organizing the Town's records which is an ongoing and never ending process.

Planning for the Colorado 150 Celebration is coming along nicely. The community clean-up project is upon us, and we have received lots of feedback and participation from residents and volunteers alike.

I have really enjoyed engaging with and assisting the members of our community along with my coworkers and Board members.
